

FPT INDUSTRIAL STRENGTHENS ITS PRESENCE IN THE UK AND IRELAND WITH FOUR NEW DISTRIBUTORS

Turin, Italy, February 13th, 2025

FPT Industrial, the Iveco Group brand dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications, has announced **the expansion of its presence in the United Kingdom and Ireland by appointing four new distributors: Marline Marine Engineering Ltd, Breakwater Marine Ltd, Engines Plus Ltd, and Mitchell Diesel Ltd**. The companies, which will also be responsible for providing service and parts sales, represent an expansion of FPT Industrial's network in the EMEA region as well as significant growth.

NEW DISTRIBUTORS APPOINTED

With over fifty years of marine experience, **Marline Marine Engineering Ltd** is a center of excellence for boat builders, fishermen, private boat owners, rescue organizations, and power generation suppliers. The company is an official distributor for marine applications in the UK and Ireland.

An official distributor in UK for marine applications, drivelines, axles, and transmissions, **Breakwater Marine Ltd** has a team of highly experienced and qualified engineers who are always at the customer's side, guaranteeing reliable and efficient service. The company strives

to offer a professional, high-quality service providing maintenance and care for marine applications, from fishing vessels to luxury motor yachts.

Founded in 2009, **Engines Plus Ltd** has quickly become recognized as an influential supplier to the industrial and marine engine market in UK. Its success is based around the depth of experience of its staff, and their ability to supply correctly engineered packages to meet the specific demands of an extremely competitive market environment. The company is an official distributor for marine, off-road, on-road, and power generation applications, as well as drivelines, axles, and transmissions.

Founded in 1950 and now employing around 200 loyal and dedicated professionals, **Mitchell Diesel Ltd** is an official distributor for marine, off-road, on-road, and power generation applications, as well as drivelines, axles, and transmissions. It is one of the largest diesel engineering service companies in the UK.

Andrea Arcuraci, Head of Sales EMEA Dealers at FPT Industrial, stated: *“We are proud to announce the strengthening of our EMEA distributor network. Our goal is to stand even closer to our customers, both existing and new, providing sales and support services that meet all of their needs. The new distributors will reinforce our presence in two key markets, the UK and Ireland, where we expect to see the positive results of this strengthening in the coming months.”*

Active in the UK market for several years, **FPT Industrial's marine engines fully comply with the country's current emission regulations**. The F1C (S30), N40, N60, N67 450 N, N67 550, N67 570 EVO, CURSOR 9 and CURSOR 16 1000 meet the current UKCA Recreational Craft Regulations. In the commercial sector, the entire product portfolio complies with IMO TIER III regulations. FPT Industrial's marine engines ranging from 4 to 15.9 liters comply with TIER III IMO regulations, thanks to the selective catalytic reduction (SCR) system designed in partnership with Frydenbø Industri AS Marine, official distributor of FPT Industrial's products and services in Norway and Sweden. Additionally, the N40, N67 and CURSOR 9 engines comply with IWV Stage V / GBTA emission standards, which are required for inland waterways.

As a **recognized leader in the European off-road engine market**, with more than 150,000 units sold on average annually in this sector, FPT Industrial collaborates with key OEMs, powering agricultural machinery and construction equipment across a wide range of applications. The comprehensive engine portfolio ranges from compact 2.8 liter engines to powerful 20 liter solutions, all compliant with Stage V emission standards, which are also applicable in the UK and Ireland. Thanks to the **HI-eSCR2** system, which requires no machine

redesign or layout changes compared to the previous technologies, this solution incorporates a maintenance-free filtering device in an SCR catalyst.

FPT Industrial's offering for **on-road applications** in UK and Ireland includes the **F1C** engine from the F1 series, and the **N45** and **N67** engines from the NEF series. With **over two million units sold since 2003**, the F1C has become a best-seller in Europe due to its efficiency, outstanding performance, and class-leading durability. The N45 and N67 engines deliver high reliability and fuel efficiency, thanks to their lack of EGR and the HI-eSCR after-treatment system, which makes regeneration unnecessary. These three engines are ideal for a wide range of applications, including light commercial vehicles, minibuses, utility and special vehicles such as municipal equipment and street sweepers.

With over 30,000 units sold worldwide each year, **FPT Industrial is also a leader in power generation engines**. The brand's comprehensive range, from 2.4 to 16 liters and from 20 to 685 kVA, ensures optimal performance across various applications and power generation needs. Whether unregulated or Stage V compliant, they guarantee reliability, efficiency, and excellent fuel consumption and power output. At the core of the power generation line-up, the **G-Drive**, a quick-to-market solution that includes a pre-assembled cooling pack and air cleaner.

FPT Industrial is dedicated to delivering not only high-performance engines but also exceptional customer service. With a customer-centric approach, **FPT Customer Service** offers a tailored MyFPT portfolio of products and services designed to meet the specific needs of each customer. Leveraging advanced onboard telematics and a cutting-edge Control Room system, real-time engine monitoring, remote diagnostics, and predictive maintenance are seamlessly integrated to enhance performance, improve efficiency, and minimize downtime. To ensure long-term reliability and value, FPT Industrial supplies genuine spare parts, high-quality fluids, and original remanufactured solutions, providing a sustainable and cost-effective alternative without compromising on quality. Additionally, an extended warranty program is available, customizable to align with specific operational requirements. Joining forces with customers, FPT Industrial strives to develop tailored solutions that drive their business forward and overcome challenges together in an ever-evolving world.

***FPT Industrial** is a brand of Iveco Group N.V. (EXM: IVG), dedicated to the design, production, and sale of powertrains and solutions for on- and off-road vehicles, as well as marine and power generation applications. Over 8,000 people across ten production sites and ten R&D centers work for FPT Industrial all around the world. Active in nearly 100 different countries, its global sales and its Customer Service department supports all Brand*

customers. The extensive product offering includes six engine ranges with power outputs from 30 hp to over 1,000 hp, transmissions with torque up to 500 Nm, and front and rear axles from 2.45 to 32 tonne GAW (Gross Axle Weight). FPT Industrial offers the most complete line-up of natural gas engines for industrial applications on the market, with power outputs ranging from 50 to 520 hp. A dedicated ePowertrain division is accelerating the path towards net zero-emissions mobility, with electric drivelines, battery packs, and battery management systems. This extensive offering, and its strong focus on R&D, makes FPT Industrial a world leader in industrial powertrains and solutions. For more information, visit www.fptindustrial.com.
